VISION FOR IDENTIFICATION

INTELLIGENT CONTROL
BEYOND SCANNING

MODi
VISION FOR IDENTIFICATION

PalletTrace

CHANGING THE WORLD OF TOMORROW TODAY!

MORE than just Barcode Scanning
Your processes, our solutions.

Comprehensive hardware and software solutions to support **TRACEABILITY** of pallets at every step of the warehouse process.

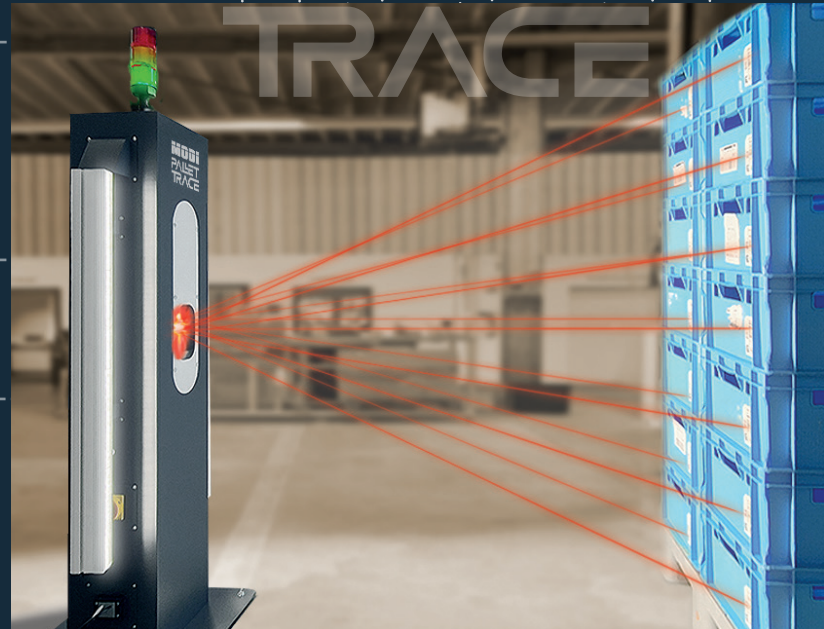

Thanks to our patented technology, one scanner can cover an area measuring 220 cm in height and 120 cm in width from a distance of just 160 cm.

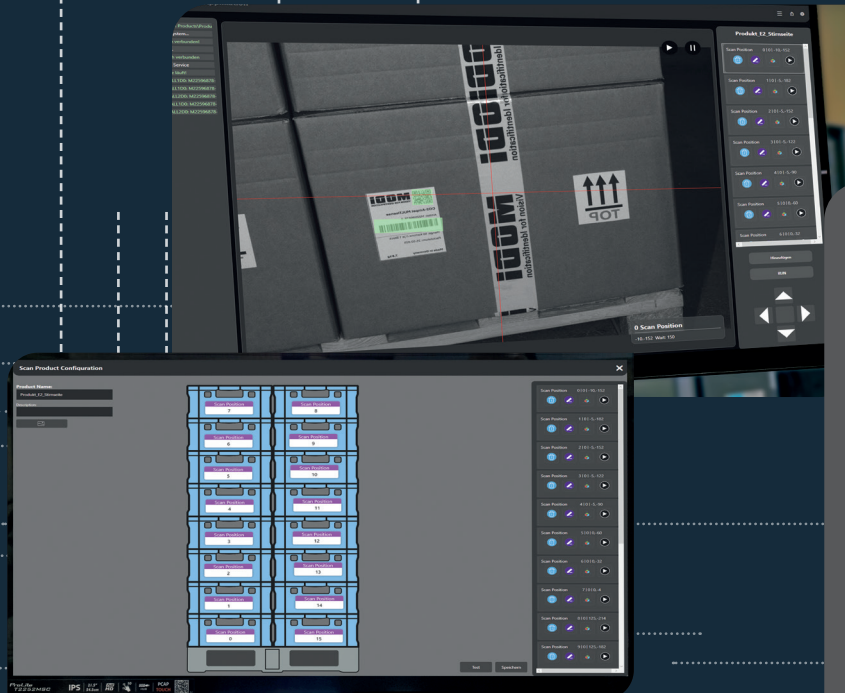

The optional camera extension of the MODI PalletTrace can perform additional inspection tasks, such as checking packaging for damage or Optical Character Verification (OCV).

This enables efficient and cost-effective data capture across large surface areas. Each scanning system comes with a stable tripod and suitable lighting.

**MORE THAN JUST
BARCODE-SCANNING**

MODI
PALLET
TRACE

Our smart software automatically ensures that no barcodes from boxes or cartons located behind a gap are captured. This efficiently prevents incorrect assignments.

Maximum Scanning Range at Minimal Distance

- With an extremely large scanning area of up to 220 cm in height and 120 cm in width from just 160 cm away, the system captures even large pallets with the highest precision
- Significant time savings through lightning-fast scanning of all barcodes!
- Error reduction through automatic completeness and quality checks
- Seamless integration into existing logistics processes and ERP systems
- Comes with a touchscreen and is designed for a rough industrial environment
- Real-time preview for precise programming, testing, and troubleshooting
